Volkswagen Financial Services Australia

Sydney, Australia

After delivering the End of Term Refinance program through Katzion, VWFS brought me on board directly to keep driving it and the broader Salesforce roadmap from the client side.

VWFS – End of Term Refinance (Enhancements)

> **Client Domain:** Automotive & Financial Services
> **Salesforce Products:** Sales Cloud, Experience Cloud
> **Integrations:** Onfido, Scrive
> **Role:** Lead Business Analyst

Responsibilities & Contributions

- Led discovery workshops with business, operations, and technology stakeholders to define the future-state refinance journey.
- Conducted As-Is and To-Be process analysis and identified key business, operational, and compliance gaps.
- Produced functional requirements, user stories, acceptance criteria, process flows, and integration specifications.
- Defined integration requirements for identity verification (Onfido) and electronic signature (Scrive) platforms.
- Worked closely with solution architects, developers, and vendors throughout design and delivery phases.
- Facilitated sprint planning, backlog refinement, stakeholder demonstrations, and change request discussions.
- Led UAT, training, deployment readiness, and post-production support activities.

Business Outcomes

- Increased offer-to-contract conversion rates by **70%**.
- Reduced application turnaround time through automated verification and contract execution.
- Improved customer experience through a fully digital refinance process.

VWFS – Marketing Consent Management

> **Client Domain:** Automotive & Financial Services
> **Salesforce Products:** Sales Cloud, Experience Cloud, Marketing Cloud
> **Integrations:** Data Warehouse, Contract Management System
> **Role:** Lead Business Analyst

Responsibilities & Contributions

- Led end-to-end delivery of a centralized customer preference and consent management solution.
- Replaced legacy consent functionality with a multi-brand preference management framework.
- Defined customer self-service and agent-assisted consent management journeys.
- Collaborated with integration teams to synchronize preference data across multiple platforms.
- Led data cleansing, migration, deduplication, and backfill activities across existing customer records.
- Managed UAT, training activities, reporting requirements, and production deployment.
- Proposed UX improvements to enhance customer engagement and preference management adoption.

Business Outcomes

- Successfully cleansed and synchronized **130K+ customer records**.
- Established a single source of truth for customer preferences.
- Improved campaign targeting, compliance reporting, and marketing effectiveness.

Used Car Finance Enquiry Advertising

> **Client Domain:** Automotive & Financial Services
> **Salesforce Products:** Sales Cloud, Experience Cloud
> **Integrations:** Dealer Studio, Dealer Storefront
> **Role:** Lead Business Analyst

Responsibilities & Contributions

- Led discovery workshops and stakeholder engagement activities with pilot dealers, business users, and IT teams.
- Collaborated with Solution Architects to define the target-state solution and integration approach.
- Defined customer journeys, process flows, and wireframes to support the end-to-end enquiry experience.
- Gathered and documented business requirements, user stories, and acceptance criteria.
- Worked closely with dealer IT teams to align lead management processes and data mappings across platforms.
- Coordinated API integration discussions, resolved technical dependencies, and managed vendor communications.
- Led UAT, business readiness, training, reporting validation, and production deployment activities.

Business Outcomes

- Successfully delivered the solution across **4 pilot Volkswagen dealers** in Australia.
- Increased customer engagement by **400%** through integrated finance enquiry journeys on dealer websites.
- Enabled a seamless customer experience by connecting dealer storefronts with Salesforce in real time.
- Improved enquiry tracking, lead visibility, and conversion opportunities across participating dealerships.

Katzion Technology

A GlobalLogic Company — Melbourne, Australia

Toyota Australia – CRM to MDM Integration

> **Client Domain:** Automotive
> **Salesforce Products:** Sales Cloud
> **Integrations:** MDM, SAP, Enterprise Data Platforms
> **Role:** Salesforce Business Analyst

Responsibilities & Contributions

- Led business analysis activities for customer master data synchronization initiatives.
- Defined requirements for real-time customer record synchronization between Salesforce and MDM systems.
- Produced data mapping documents, integration requirements, and process flows.
- Worked closely with integration architects and technical delivery teams.
- Participated in PI Planning and roadmap discussions with business stakeholders.
- Supported testing, defect triage, and business validation activities.
- Assisted with deployment planning and production readiness reviews.

Business Outcomes

- Improved customer data consistency across enterprise systems.
- Reduced duplicate customer records by **95%+**.
- Enhanced customer visibility across integrated platforms.

CUPRA Fleet Quote-to-Order Platform

> **Client Domain:** Automotive
> **Salesforce Products:** Sales Cloud, Experience Cloud, Marketing Cloud
> **Role:** Salesforce Business Analyst

Responsibilities & Contributions

- Facilitated discovery workshops involving business stakeholders, product owners, and delivery teams.
- Mapped fleet sales processes and documented future-state Quote-to-Order workflows.
- Produced user stories, process maps, acceptance criteria, and functional specifications.
- Defined requirements across lead management, opportunity management, quoting, and order processing.
- Collaborated with UX, development, and QA teams throughout delivery.
- Facilitated sprint reviews, stakeholder demos, and UAT activities.
- Delivered user training sessions and operational documentation.

Business Outcomes

- Eliminated manual spreadsheet-based quoting processes.
- Reduced quote processing effort by **60%**.
- Improved sales process consistency and fleet customer experience.

Audi – Customer Data Quality & Migration

> **Client Domain:** Automotive
> **Salesforce Products:** Sales Cloud
> **Integrations:** AWS S3, SAP
> **Role:** Salesforce Business Analyst

Responsibilities & Contributions

- Led business analysis and data mapping activities for VIN-based data migration initiatives.
- Defined migration rules, deduplication logic, and business validation criteria.
- Collaborated with business stakeholders and technical teams on migration planning.
- Developed mapping specifications and migration validation processes.
- Supported data quality assessments and cleansing activities.
- Coordinated testing and data verification activities before production deployment.
- Facilitated stakeholder reviews and migration sign-off activities.

Business Outcomes

- Successfully cleansed and deduplicated **25K+ customer records**.
- Improved reporting accuracy and customer data quality.
- Established a more reliable customer dataset across operational systems.

Amarok Service Plan – Rebate Claim Management

> **Client Domain:** Automotive
> **Salesforce Products:** Sales Cloud, Experience Cloud
> **Role:** Salesforce Business Analyst / Functional Consultant

Responsibilities & Contributions

- Led discovery workshops to define rebate claim management and service plan administration requirements.
- Designed the end-to-end process for service plan registration, claim submission, approval, and rebate tracking.
- Produced business requirements, process maps, user stories, and functional specifications.
- Collaborated with solution architects and development teams to design a scalable claims management solution.
- Defined dealer portal enhancements to streamline claim creation, tracking, and approvals.
- Worked closely with business stakeholders throughout testing, deployment, and production rollout.
- Supported training, user adoption activities, and post-go-live business readiness.

Business Outcomes

- Reduced manual dealer enquiries and support calls by **50%** through automated claim management.
- Improved claim processing accuracy, auditability, and rebate tracking visibility.
- Accelerated claim turnaround times through workflow automation and dealer self-service capabilities.
- Increased service plan purchases through the portal by **60%**, driving higher dealer engagement.

VW ID.4, ID.5 & ID.Buzz – Register Your Interest Platform

> **Client Domain:** Automotive
> **Salesforce Products:** Sales Cloud, Marketing Cloud, Experience Cloud
> **Role:** Salesforce Business Analyst / Functional Consultant

Responsibilities & Contributions

- Facilitated discovery workshops to define lead capture requirements for Volkswagen's EV launch campaign.
- Defined customer journeys, process flows, and lead qualification requirements.
- Configured Salesforce lead capture forms, page layouts, and customer-facing experiences.
- Produced functional requirements and integration specifications for booking and deposit processes.
- Collaborated with developers, QA teams, and stakeholders throughout delivery.
- Supported payment gateway integration discussions and customer booking workflows.
- Managed testing, deployment readiness, and launch support activities.

Business Outcomes

- Successfully delivered a business-critical solution within a compressed delivery timeline.
- Generated **10,000+ customer leads** on the first day of launch.
- Enabled a smooth go-live experience with no major production issues.
- Supported the successful launch of Volkswagen's EV product range across Australia.

Toyota Australia – Customer Search Enhancement & Dealer Portal Optimisation

Client Domain: Automotive & Finance
Salesforce Products: Sales Cloud, Experience Cloud
Integrations: SAP, TUNE, MDM
Role: Salesforce Business Analyst

Responsibilities & Contributions

- Joined the project during delivery and quickly assumed ownership of business analysis activities.
- Analysed dealer portal usability challenges and proposed UI/UX improvements.
- Defined requirements for customer fuzzy-search functionality and dealer experience enhancements.
- Facilitated stakeholder workshops, requirement refinement sessions, and sprint ceremonies.
- Delivered weekly demonstrations and incorporated stakeholder feedback into delivery plans.
- Developed training materials, user guides, and operational documentation.
- Supported UAT, deployment planning, and post-go-live stabilisation activities.

Business Outcomes

- Enabled customer search using partial names, phone numbers, and email addresses.
- Improved dealership customer service efficiency by approximately **40%**.
- Enhanced customer visibility through improved search capabilities and Customer 360 views.
- Reduced manual data searches and improved enquiry management efficiency.

Škoda Enyaq – Register Your Interest Form

Client Domain: Automotive
Salesforce Products: Sales Cloud, Experience Cloud
Integrations: SAP, Amazon S3
Role: Salesforce Business Analyst / Functional Consultant

Responsibilities & Contributions

- Facilitated discovery workshops to define customer lead capture requirements.
- Designed customer journeys and lead routing requirements for dealership engagement.
- Configured Salesforce forms, page layouts, and Experience Cloud components.
- Produced functional specifications and supporting process documentation.
- Worked closely with development and QA teams throughout implementation and testing.
- Managed stakeholder communication and deployment readiness activities.
- Supported production rollout and post-launch business support.

Business Outcomes

- Successfully launched a digital lead capture platform supporting the Enyaq vehicle release.
- Streamlined lead routing from customer enquiries to dealership sales teams.
- Improved visibility of customer interest throughout the sales lifecycle.
- Enabled faster response times for prospective EV customers.

VWFS – End of Term Refinance (Phase 1 & Phase 2)

> **Client Domain:** Automotive & Financial Services
> **Salesforce Products:** Sales Cloud, Experience Cloud
> **Integrations:** Onfido, Scrive
> **Role:** Lead Business Analyst

Responsibilities & Contributions

- Led discovery workshops with cross-functional business and technology stakeholders.
- Conducted As-Is and To-Be analysis to identify business process improvement opportunities.
- Produced functional requirements, user stories, acceptance criteria, process maps, and risk assessments.
- Defined integration requirements for identity verification and digital signature platforms.
- Managed requirements for traceability from epics through detailed user stories.
- Facilitated weekly stakeholder demonstrations, backlog refinement, and change request discussions.
- Led UAT, end-user training, deployment readiness, and post-production support activities.

Business Outcomes

- Automated a previously manual refinance process, significantly improving operational efficiency.
- Increased refinance offer conversion rates by approximately **60-70%**.
- Improved customer retention through a seamless end-of-term digital refinance journey.
- Delivered more than **250 user stories** across two implementation phases and multiple integrations.
- Reduced processing effort through automated identity verification and electronic contract execution.

Yash Technologies

Pune, India

Reusable Case Management Framework

> **Client Domain:** Insurance, Retail, Manufacturing, E-Commerce
> **Salesforce Products:** Service Cloud, Experience Cloud
> **Role:** Business Analyst / Scrum Master

Responsibilities & Contributions

- Led end-to-end delivery of customer service and case management solutions.
- Conducted discovery workshops and documented business and functional requirements.
- Produced process flows, user stories, acceptance criteria, and solution documentation.
- Configured and supported Service Cloud capabilities including case routing and service processes.
- Worked closely with development and QA teams throughout Agile delivery cycles.
- Facilitated backlog management, sprint planning, reviews, and stakeholder demonstrations.
- Supported deployment, training, and post-production stabilization activities.

Business Outcomes

- Developed a reusable implementation framework adopted across **6+ client programs**.
- Reduced project delivery timelines by **40%**.
- Accelerated deployment of customer service capabilities across multiple industries.

Weather Forecast Notification Platform

> **Client Domain:** Insurance
> **Salesforce Products:** Sales Cloud, Marketing Cloud
> **Integrations:** AccuWeather API
> **Role:** Business Analyst

Responsibilities & Contributions

- Facilitated workshops to define weather-triggered customer engagement requirements.
- Conducted process analysis and documented future-state notification journeys.
- Produced epics, user stories, acceptance criteria, and process documentation.
- Defined integration requirements between Salesforce, Marketing Cloud, and AccuWeather.
- Collaborated with developers, project managers, and QA teams throughout delivery.
- Managed sprint planning, delivery tracking, and stakeholder communications.
- Led UAT and reporting requirements validation activities.

Business Outcomes

- Enabled automated real-time weather-triggered customer notifications.
- Improved customer engagement through context-driven communications.
- Established a scalable integration framework for future campaign initiatives.

Order Management Capability

> **Client Domain:** Manufacturing
> **Salesforce Products:** Sales Cloud, Commerce Cloud
> **Role:** Business Analyst (Pre-Sales & Delivery)

Responsibilities & Contributions

- Partnered with product managers and development teams to design an MVP for a B2C order management platform.
- Facilitated discovery workshops to understand customer ordering processes and identify digital transformation opportunities.
- Mapped future-state order management journeys covering customer onboarding, ordering, fulfilment, and tracking.
- Defined business requirements, process flows, user stories, and solution specifications.
- Presented solution concepts and demonstrations to both internal and customer stakeholders.
- Refined requirements and solution designs through multiple stakeholder feedback sessions.
- Supported the transition from pre-sales engagement to a fully approved delivery project.

Business Outcomes

- Successfully converted the MVP into a signed implementation project for a leading garment manufacturer.
- Enabled a direct-to-customer sales model, reducing dependency on intermediaries and associated operational costs.
- Improved customer ordering experience through a streamlined digital purchasing journey.
- Reduced manual order processing effort by an estimated **40%** through workflow automation.
- Increased order visibility and tracking throughout the customer lifecycle.

Patient & Healthcare Services Integration

> **Client Domain:** Healthcare
> **Salesforce Products:** Health Cloud, Marketing Cloud
> **Integrations:** Legacy Healthcare Systems, Data Migration Platforms
> **Role:** Business Analyst (Pre-Sales)

Responsibilities & Contributions

- Partnered with product and development teams to design a healthcare services MVP connecting patients, providers, and administrators.
- Facilitated discovery sessions to capture patient management, service delivery, and operational requirements.
- Defined future-state business processes for patient onboarding, service coordination, and stakeholder communication.
- Produced user journeys, process maps, and functional solution specifications.
- Designed Health Cloud-based patient management workflows and communication capabilities.
- Presented the solution vision and MVP to internal and customer stakeholders.
- Supported business case preparation and project initiation activities.

Business Outcomes

- Successfully converted the MVP into a funded implementation for a government healthcare organisation.
- Established a unified patient management framework across multiple stakeholder groups.
- Improved visibility into patient services and operational workflows.
- Reduced reliance on manual processes through a digital-first service delivery model.

BitHub Technology

Insurance Product Recommendation Journey

> **Client Domain:** Insurance
> **Salesforce Products:** Sales Cloud, Experience Cloud
> **Role:** Business Analyst

Responsibilities & Contributions

- Collaborated with underwriting and product teams to understand policy recommendation and customer acquisition processes.
- Defined customer eligibility criteria, recommendation logic, and decision pathways.
- Designed customer journeys focused on policy recommendations and lead generation.
- Configured Experience Cloud pages and Salesforce lead management processes to support the solution.
- Documented business requirements, acceptance criteria, and end-to-end test scenarios.
- Worked closely with UX, development, and QA teams throughout implementation.
- Monitored post-launch performance and refined lead routing and customer engagement processes.

Business Outcomes

- Improved customer self-service capabilities through guided policy recommendation journeys.
- Increased lead quality by matching customers to suitable insurance products based on eligibility criteria.
- Reduced manual assessment effort through automated recommendation and routing processes.
- Improved conversion opportunities through seamless integration between customer journeys and lead management processes.

Delivery Highlights

Industry Experience

Automotive, Financial Services, Manufacturing, Healthcare, Insurance, Retail, Government, Not-for-Profit

Salesforce Product Experience

Sales Cloud, Service Cloud, Experience Cloud, Marketing Cloud, Health Cloud, Commerce Cloud, Automotive Cloud

Integration Experience

SAP, MDM, Onfido, Scrive, AWS, TUNE, AccuWeather, REST APIs, SOAP APIs, Marketing Cloud Connect

Key Delivery Achievements

- Delivered 15+ CRM, Digital Transformation, and Customer Experience initiatives.
- Led business analysis activities across Financial Services, Automotive, Manufacturing, Insurance, and Healthcare domains.
- Facilitated stakeholder workshops, requirements elicitation, process mapping, UAT, and change management.
- Delivered enterprise integrations across Salesforce, SAP, AWS, MDM, Onfido, Scrive, TUNE, and AccuWeather.
- Supported pre-sales, MVP development, solution design, and end-to-end delivery programs.
- Delivered measurable outcomes including 70% conversion uplift, 400% customer engagement growth, 130K+ record synchronisation, and 95%+ duplicate reduction.
